Subject: RE: Mayflower Oil Spill - QASP
Date: Friday, April 05, 2013 9:57:55 PM

Tom:

The QASP for Exxon Mayflower looks good. Just a few minor comments.

I will sign off on the QASP for Nic.

1. Section 2.1 - first paragraph: It states that oil flowed west from the break in the pipeline.... this should actually state that the oil flowed east.
2. Section 2.1 - second paragraph: It states that the pipeline is buried 24 inches deep.... do you agree with this statement? I'm not sure it was quite that deep.... I thought it was closer to 18 inches from the surface.... what is your opinion?

Also, same paragraph, the estimate by Exxon on the volume released is now 5,000 bbl.

3. Section 3.1.1 - the objective of the sampling is to also fingerprint the oil to help identify the source of the oil.
4. Section 3.2.1 - please revise to say that samples will also be collected from the pipeline upstream of the rupture area at the Conway pump station.

thanks

Mike McAteer, OSC

which may be a computer program. This attached computer
program could
contain a computer virus which could cause harm to EPA's
computers,
network, and data. The attachment has been deleted.

This was done to limit the distribution of computer viruses
introduced
into the EPA network. EPA is deleting all computer program
attachments
sent from the Internet into the agency via Email.

If the message sender is known and the attachment was
legitimate, you
should contact the sender and request that they rename the
file name
extension and resend the Email with the renamed attachment.
After
receiving the revised Email, containing the renamed
attachment, you can
rename the file extension to its correct name.

For further information, please contact the EPA Call Center at
(866) 411-4EPA (4372). The TDD number is (866) 489-4900.
